

Full Description for Estateley Website

Overview:

Our Real Estate Website is a modern, feature-rich platform designed to connect property buyers, sellers and agents in one seamless digital environment. With an elegant interface, powerful search tools, and real-time listings, the platform provides users with an effortless way to explore and manage properties anytime, anywhere.

Main Features

1. Property Listings

- Dynamic and up-to-date listings for residential, commercial, and land properties.
- Each listing includes high-quality images, property details, pricing, and agent contact information.
- Users can filter results by location, price range, property type, area size, and amenities.

2. Advanced Search & Filtering

- Intelligent search bar with auto-suggestions and location-based search.
- Custom filters allow users to find properties that perfectly match their preferences.

3. User Accounts & Profiles

- Secure registration for buyers, sellers, and real estate agents.
- Profile pages for agents with ratings, reviews, and contact forms.

4. Property Management Panel

- Easy-to-use admin dashboard to add, edit, or delete property listings.
- Manage users, agents, and featured listings efficiently.

5. Interactive Media

- High-resolution image galleries with zoom functionality.

6. Contact & Inquiry System

- Appointment scheduling system for property visits.

7. Responsive & Modern Design

- 100% mobile-friendly with smooth performance on phones and tablets Built with Bootstrap / .NET MVC.

8. Security & Performance

- HTTPS encryption, secure cookies, and anti-spam forms.
- Caching and image optimization for fast loading.

9. Additional Features

- Blog & news section for real estate trends, tips, and market insights.
